“Ethics in the life sciences: How to take responsibility in research practice”

19 November 2019, 13:30 (s.t.)

Conceptually, science is regarded as a value-free enterprise. In modern life sciences, however, fundamental research and practical application are closely intertwined. New technological options give rise to moral controversies. How can scientists cope with this challenge? Do they bear specific social responsibility? And what does it take to meet this expectation? The lecture offers an introduction to the fundamentals and principles of research ethics.

**Venue: 2nd Floor Seminar Room
Institute of Molecular Biology (IMB)
Johannes Gutenberg University Campus**

All are welcome to attend

Host: Dr Ralf Dahm

For further information, please contact: Dr Daniela Happel, sfb1361@imb.de

Institute of Molecular Biology gGmbH (IMB), Ackermannweg 4, 55128 Mainz
